

Project Goal

General design concepts

The website should be simple and intuitive. The most important elements should be visible at a glance.

1. A rough sketch of the Main page

Details page

On the details page the user can see one concert in detail. In this view all the (given) details are visible to the user.

Koncert name

Koncert details:

- Location
- Time

Performed pieces:

- 1st piece by Composer1
- 2nd piece by Composer2
- etc.

Description of the concert:

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc maximus, nulla ut commodo sagittis, sapien dui mattis dui, non pulvinar lorem felis nec erat. Aliquam egestas, velit at condimentum placerat, sem sapien laoreet mauris, dictum porttitor lacus est nec enim. Vivamus feugiat elit lorem, eu porttitor ante ultrices id. Phasellus suscipit tellus ante, nec dignissim elit imperdiet nec. Nullam fringilla feugiat nisl. Ut pretium, metus venenatis dictum viverra, dui metus finibus enim, ac rhoncus sem lorem vitae mauris. Suspendisse ut venenatis libero. Suspendisse lorem felis, pretium in maximus id, tempor non ipsum

2: rough sketch of the Details page

Create concert page

The create page is for creating a new concert. There are input fields for texts, drop-down menus, checkboxes for easier creation.

Create “other” page

The create “other” page is for creating all the database entities beside the concerts. (This has different user requirements than the concert creation.) There are input fields, and buttons for creating individual database elements independently. (Each button is hooked up to a POST request.)

Sitemap

The website loads with the Main page on display at first. The Details page is accessible from all the concert widgets on the Main page. The Create concert and Create “other” pages are accessible from the control panel of the Main page.
